operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix); and

(c) the quantity and value of your firm(s) exports to the United States of Subject Merchandise and, if known, an estimate of the percentage of total exports to the United States of Subject Merchandise from the Subject Country accounted for by your firm(s) exports.

(12) Identify significant changes, if any, in the supply and demand conditions or business cycle for the Domestic Like Product that have occurred in the United States or in the market for the Subject Merchandise in the Subject Country after 2013, and signify, if any, that are likely to occur within a reasonably foreseeable time. Supply conditions to consider include technology, production methods, development efforts; ability to increase production (including the shift of production facilities used for other products and the use, cost, or availability of major inputs into production); and factors related to the ability to shift supply among different national markets (including barriers to importation in foreign markets or changes in market demand abroad). Demand conditions to consider include end uses and applications; the existence and availability of substitute products; and the level of competition among the Domestic Like Product produced in the United States, Subject Merchandise produced in the Subject Country, and such merchandise from other countries.

(13) (OPTIONAL) A statement of whether you agree with the above definitions of the Domestic Like Product and Domestic Industry; if you disagree with either or both of these definitions, please explain why and provide alternative definitions.

BILLING CODE 7020–02–P
regulations at 27 CFR part 555 should not be impacted by the addition of these explosive materials to the annual list because all explosive materials, including those not on the annual list (with the exception of certain materials noted in exemptions at 18 U.S.C. 845 and the implementing regulations at 27 CFR 555.141), already are regulated under this part. These materials are subject to the restrictions and regulations in this part regarding the requirements for manufacture, storage, distribution, use, and licensing or permitting. Any person who receives explosive materials is already required to be licensed as an importer, manufacturer, or dealer in explosive materials, or to hold a permit as an explosives user. For persons who already hold a license or permit under the explosives laws, no further action on their part would be required for them to acquire newly-added explosive materials.
